Conversions

To convert a metric time achieved in a 25-meter racing course to an equivalent time for a 25-yard racing course: (a) transform the achieved metric time into seconds; (b) carrying the calculation out to five decimal places, multiply the transformed time in seconds by the appropriate following conversion factor; (c) drop, without rounding, all units smaller than a hundredth of a second; and (d) finally, transform the resultant value in seconds back into minutes and seconds to obtain the converted time.

Short-Course Conversion Factors (Men and Women)

Event	Factor
400 meters to 500 yards	1.153
800 meters to 1,000 yards	1.153
1,500 meters to 1,650 yards	1.013
All other events	0.906

Please note that the conversion table above does not reflect what is included in the NCAA Swimming and Diving Rules Book. This document reflects what will be used for selection to and seeding at the 2012 Division I swimming and diving championships.

All time standards, consideration standards and optional-entry standards may be achieved only in 25-yard or 25-meter racing courses. No times achieved in 50-meter courses will be eligible for selection.
